Stage Struck Productions has helped us produce a marvelous new film for use in driver education classes and school assemblies. Danny's Still Here shows the vast changes in one family's lives because of a sudden event, a death through reckless driving. While the movie has humor and an exciting, fun finish, its essence deals with a very modern-day concern involving legal and profound psychological issues. Currently renting at selected Family Video stores, the movie is now available for purchase by high schools through Victim Impact Speakers. Here's what some viewers had to say:

"I was impressed with the sensitivity of the story and found it to be very moving."

"Very inspiring."

"A roller-coaster ride of emotions. Loved it!"

"This movie should be seen by everyone."

Danny's Still Here is one hour and 45 minutes long, has original background music, and features remarkable acting talent. You can add this valuable teaching tool to your school's library for only \$20 by returning the form below.
